

Keno excitement is every 4 minutes! Win even bigger prizes with Bull's-eye and progressive jackpots.

### HOW TO PLAY:

1. Ask the store clerk for a Quick Pick (QP) ticket with a maximum of one board or fill out a play slip and choose how many "spots" (numbers) you want to play per game. Choose from 1 to 10 spots.
2. Choose how much you want to wager per game: \$1, \$2, \$3, \$4 or \$5. Your wager will affect the prize amounts you win. Just multiply the game prize for a \$1 play by the wagered amount to determine total prize won. The highest prize you can win is \$300,000.
3. You may choose to play the Bull's-eye option for a chance at larger prizes by doubling your wager. Match any of your numbers chosen to the Bull's-eye and win the appropriate Keno and Bull's-eye prize.
4. On the play slip pick your numbers from 1 through 80 by filling in the numbers you wish to play. The numbers you pick must be equal in number to the number of spots you have selected to play. Or, mark QP and the computer will randomly pick the numbers for you. Do not use red ink or erase a mark on a play slip.
5. Select how many consecutive games you want to play. Choose 1, 2, 3, 4, 5, 10, 20, 50 or 100 consecutive games.
6. Present your completed play slip to your Lottery retailer who will give you your ticket.
7. Players can watch Keno drawings on the Kansas Lottery website. This option gives players the opportunity to watch Keno drawings on the Internet whenever they choose, in addition to watching them on a Keno monitor at their favorite Kansas Lottery retailer location.

## Play from 4 a.m. (CT) to 2:52 a.m. (CT) every day!

You have until 2:51 a.m. to purchase tickets.

### HOW TO WIN:

The computer randomly draws 20 numbers every 4 minutes and displays them on the Keno monitor. The Bull's-eye number is highlighted in white. Keno tickets can be checked by a Lottery retailer or with a Ticket Checker machine.

Overall odds	1:4.00	Overall odds 1:80.00

\*Progressive jackpots - Players can win even bigger prizes in the 6-, 7- and 8-spot Keno games. Match 6 of 6, Match 7 of 7 or Match 8 of 8 in either the 6-, 7- or 8-spot games and win the top prize in the game PLUS the jackpot bonus prize for that game (shown on Keno monitors).

The maximum prize per ticket for matching 10 of 10 in the 10-spot basic Keno game is \$100,000, which is increased by \$200,000 if the Bull's-eye option is played and that number is one of those 10 numbers. (No ticket value should exceed \$300,000 for any options played.) Additionally, if a \$5 wager is made on a 9 of 9 in the 9-spot basic Keno game, the prize will be limited to \$100,000 and will be increased by \$200,000 if the Bull's-eye option is played and that number is one of those 9 numbers.

All Keno prizes including Bull's-eye prizes shall be the prizes set forth except when the prize in any game from a 5-spot game through a 10-spot game exceeds \$599 where total prizes for that game and the prize category for a single draw exceed \$1,500,000. If that occurs, prizes shall be calculated on a pari-mutuel basis.
